

# PREMKUMAR DANAV

Full Stack Developer | Java | Spring Boot | Node.js | React.js | AWS  
Pune, India | +91-7038852922 | [premdanav@gmail.com](mailto:premdanav@gmail.com) | [linkedin.com/in/prem-danav](https://linkedin.com/in/prem-danav)

## SUMMARY

Full Stack Developer with 3+ years of experience in full stack web development, designing and developing scalable web applications, RESTful APIs, and microservices using Java, Spring Boot, Node.js and React.js. Proficient in object-oriented programming, SQL and application development across Healthcare and SaaS domains. Hands-on experience in AI integration (LLMs, OpenAI, Vertex AI), JWT-based authentication, Spring Security, and cloud platforms (AWS). Strong focus on clean code, unit testing, code reviews, and Agile/Scrum delivery.

## SKILLS

**Languages:** Java, JavaScript, TypeScript, Python, Node.js  
**Frontend:** React.js, Redux, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, Responsive Web Design  
**Backend:** Java Spring Boot, Spring Security, Spring Data JPA, REST API Development, Microservices Architecture, Object Oriented Programming  
**AI & ML:** OpenAI GPT, Vertex AI, Prompt Engineering, Retrieval Augmented Generation (RAG), Large Language Models (LLMs)  
**Databases:** PostgreSQL, MySQL, Redis, Hibernate ORM, SQL  
**Cloud & Tools:** AWS (Lambda, S3, SQS), GCP (Firebase, Cloud Run functions, Pub/Sub), Docker, Git, Maven, Postman, Jira  
**Security:** JWT, Spring Security, RBAC, Role-Based Access Control  
**Healthcare:** FHIR, HL7, HIPAA Compliance, EHR Integration, Cerner APIs  
**Practices:** Agile, Scrum, Code Review, Unit Testing, Problem Solving, Clean Architecture, SDLC

## WORK EXPERIENCE

**Mindbrowser Inc. — Pune, India** Nov 2023 – Present  
*Full Stack Developer*

- Developed scalable full stack web applications and microservices using Java Spring Boot and Node.js (backend) and React.js (frontend) across 3+ production projects in Healthcare and SaaS domains.
- Designed and developed RESTful APIs, implemented JWT-based authentication, Spring Security, and RBAC for secure multi-tenant access control.
- Integrated AWS and GCP services (S3, Lambda, SQS, Firebase, Cloud Run functions, Pub/Sub) for cloud-based workflows; integrated AI tools (OpenAI GPT, Vertex AI, LLMs) for intelligent application features.
- Performed code reviews, PR reviews, unit testing, and maintained Git version control following Agile/Scrum and SDLC best practices.

## PROJECTS

**33N – AI-Powered Healthcare SaaS Platform** Oct 2025 – Present  
*Full Stack Developer* | Java Spring Boot · React.js · Spring AI · Vertex AI · PostgreSQL · Redis · Docker

- Built backend microservices for a multi-tenant healthcare platform covering user management, billing, and AI-driven clinical analysis.
- Designed AI workflows with LLMs and Vertex AI (Gemini) that turn patient data and medical protocols into structured clinical analysis reports.
- Added PDF upload with AI-based document validation: invalid files raise structured exceptions, while valid files start automated clinical report generation.
- Set up Stripe subscription billing and webhook processing, and produced HTML-to-PDF clinical reports for end users.

**AI Macro Tracker – Intelligent Nutrition Management System** Feb 2024 – Dec 2024  
*Full Stack Developer* | GCP Cloud Run functions · GCP Pub/Sub · Firebase · OpenAI · Node.js

- Engineered a serverless, event-driven backend supporting 2K+ active users, reducing infrastructure costs by 60% compared with always-on servers.
- Built secure payment integration with webhook-driven state synchronization for reliable, idempotent transaction handling using RTDN for Apple and Android.
- Integrated OpenAI API for personalized meal recommendations, improving accuracy by 45% via prompt optimization.

**HealthTelematix – Healthcare Backend Project** Jan 2025 – Oct 2025  
*Backend Developer* | Spring Boot · FHIR · HL7 · Cerner APIs · PostgreSQL · Python · AWS · OpenAI · Claude

- Drove HIPAA-compliant EHR integration with Cerner's systems, using FHIR/HL7 workflows to ingest and store structured patient data.
- Connected OpenAI GPT and Claude models to power AI-driven patient communication and symptom-based clinical guidance.
- Created an AI-powered medical rule engine that checks insurance and clinical documents against ICD and CPT codes.
- Built a Python-based NLP microservice to analyze doctor notes, detect medical abbreviations, and verify clinical terms.

## EDUCATION

**PG Diploma in Advanced Computing — CDAC (77%)** 2023  
**B.Tech, Chemical Engineering — Priyadarshini Institute of Engineering and Technology, Nagpur (7.24/10)** 2021  
**12th (Maharashtra Board) — 77%, 2017** | **10th (Maharashtra Board) — 87%, 2015**

## CERTIFICATIONS & AWARDS

- AWS Certified Developer – Associate (DVA-C02)** — Valid until March 2029
- Mindbrowser Shining Star Award 2024** — Technical Excellence Recognition
- Mindbrowser Team Player Award 2024** — Outstanding Collaborative Contributions
